**Apparatus for Inhibiting Digit Sucking**

US 4,665,907

May 19 1987

Charles H. Leverette

Apparatus for attaching to the thumb or finger to inhibit thumb sucking. A bracelet fits around the wrist, and a primary ring attaches to the bracelet. The primary ring is supported by two or more tabs extending outwardly from the ring to the bracelet, and cross-tabs extend between the outward tabs to prevent unwanted withdrawal of thumb from the ring. A separate booster ring is originally attached to the primary thumb-encircling ring providing additional hindrance to thumb sucking.

# Wearable Device for Feeding and Observing Birds and Other Flying Animals

US 5,996,127

December 7 1999

David M. Leslie

A device for feeding and observing flying animals comprising a hat, a support mounted on the hat and extending outward from the hat, and a feeder mounted on the support. When flying animals feed from the feeders, a person wearing the hat may observe them from a short distance. The device may comprise a helmet with three poles mounted on it and extending from the helmet, and a feeder hanging from each of the poles. A variety of flying animals, including birds, butterflies, hummingbirds, and other small birds, may be observed with the device.

Technology is dominated by two types of people: those who understand what they do not manage, and those who manage what they do not understand.

## Pet Display Clothing

US 5,901,666

May 11 1999

Brice Belisle

A vest or belt formed with a tubular, pet receiving passageways which extend around the wearer's body and terminate in pocket-like chambers for feeding and retrieval. Outer wall portions of the passageways are transparent so that a pet moving along the passageways can be seen by a spectator. Graphics or indicia depicting the pet's habitat or a pet story are marked on the vest and extend across the passageways masking delineations or depicting the passageways as burrows.

## Men's Body Temperature Controlling Pants

US 6,038,703

March 21 2000

Sean Yung Chung

Men's pants (shorts or briefs) have a Y type separation band or a U type separation band inside thereof together with separation pads to separate the testicles from the body, the penis from the testicles, and the penis from both the hips. Complete separation around the male genitals is achieved without effort by wearing these pants. A penis band formed with an elastic band and clips is sewn into a centre part of a waist band in an I shape. A penis hole can be adjusted by moving the two clips up and down according to the individual location and size of the penis. A lower part below the clip helps to increase separation between the testicles and the penis.
